

ASHISH SHREES

+1 437-436-1466 | ashish.shrees08@gmail.com | github.com/ashrees | linkedin.com/in/ashishshrees | Toronto, ON

Professional Summary

Full-Stack Developer and Computer Programming graduate (Seneca Polytechnic, Toronto) having professional experience of building and shipping **web applications and RESTful APIs** using **JavaScript, TypeScript, Node.js, React, and SQL/NoSQL databases**. Hands-on with **asynchronous request handling, automated unit and integration testing**, and **CI/CD pipelines** (GitHub Actions, Jenkins, Docker, Kubernetes) in **Agile/Scrum** product teams. **Merged open-source contributor to NVIDIA's NemoClaw**. Eager to build **highly scalable, high-performance, customer-facing applications**

Technical Skills

Languages: JavaScript (ES6+), TypeScript, Python, Bash, SQL, C, C++, Java, HTML5, CSS3

Backend & APIs: Node.js, Express.js, RESTful APIs, Microservices, JSON, JWT

Frontend: React, Next.js, HTML5, CSS3, Tailwind CSS, Bootstrap

Databases: MongoDB, PostgreSQL, Oracle SQL

DevOps & Tools: Git, GitHub, GitHub Actions, Jenkins, Docker, Kubernetes (Minikube), CI/CD Pipelines, Continuous Delivery, Unix/Linux, Postman

Practices: Agile/Scrum, Unit Testing, Integration Testing, Automated Testing (Jest), Code Reviews, Jira, Technical Documentation, SDLC, Debugging and Root-Cause Analysis

AI/LLM Systems: LLM API integration (Claude, Gemini, DeepSeek, Ollama), RAG, multi-agent orchestration, prompt engineering

Work Experience

Hallow Tech Pvt. Ltd.

Kathmandu, Nepal

Junior Developer

Sep 2021 – Oct 2022

- Contributed to **full-stack development** of production web applications using **Node.js, MongoDB, and JavaScript**, supporting hundreds of active users across multiple feature releases.
- Designed and implemented **RESTful API endpoints** and frontend components in an **Agile/Scrum** team, reducing bug reports by approximately 20% during QA cycles.
- Wrote and maintained **unit and integration tests** and participated in **code reviews** with 5+ senior developers through Git-based workflows and sprint planning, improving release quality, deployment consistency, and code quality.
- Debugged and resolved **10–15 issues per sprint** through systematic troubleshooting and root-cause analysis, improving application stability and reducing user-facing errors.

No Frills (Loblaw Companies)

Toronto, ON

Store Associate (Part-time)

Mar 2023 – Sep 2025

- Resolved **30+ customer inquiries daily** with 95% satisfaction and maintained 98% accuracy in a fast-paced environment while studying full-time demonstrating clear communication, stakeholder-facing professionalism, and time management under pressure.

Open Source Contributions

NVIDIA / NemoClaw | *Merged Contributor (22k+ repository)*

- Authored Google Gemini provider documentation covering **model-validation filtering and troubleshooting**, grounding every documented error message directly in the implementation source; merged after multi-round maintainer review with verified, cryptographically signed commits. (PR #9183)

Node.js (nodejs/node) | *Documentation Research*

- Traced a **15-year-old documentation gap** in `fs.lchmod` to its 2011 changelog origin through changelog archaeology; the diagnosis was adopted and the fix landed in Node.js core documentation. (#65280, landed via #65283)

*Additional pull requests under maintainer review: **mui/material-ui** (accessibility fix) and **nodejs/nodejs.org** (Mermaid diagram feature for the MDX pipeline).*

Projects

Barahi Shop & Barahi Shop Manager | *React, Node.js, Express.js, MongoDB, PostgreSQL, REST APIs*

- Built and deployed a full-stack **e-commerce platform** (94% uptime) with product browsing, cart, and checkout, plus a companion **admin dashboard** for inventory, orders, and product management applying secure authentication, input validation, and error handling throughout.

AI-Native Organization OS | *Python, LLM APIs, Event-Driven Architecture, RAG*

- Architected an **event-driven multi-agent framework** integrating local Ollama deployments and cloud LLM APIs (DeepSeek, Gemini) for autonomous task-planning loops, real-time RAG diagnostics, and serialized queue orchestration manipulating **large, disparate data sets** across multiple sources and formats.

Education

Seneca Polytechnic

Toronto, ON

Computer Programming Diploma

Jan 2023 – Oct 2025

- **Relevant Coursework:** Data Structures & Algorithms, Object-Oriented Programming, Database Design & SQL, Software Testing (Jest, unit/integration testing), Web Programming & Microservices, Software Analysis & Design (UML), UNIX/Linux

Languages

English (Fluent) | Nepali (Native) | Hindi (Fluent) | Japanese (Basic)
