Professional Summary

Software Developer and Computer Programming graduate (Seneca Polytechnic) with 1+ year of professional experience across the full **SDLC**, building web applications and **RESTful APIs** using JavaScript, TypeScript, Node.js, React, Python, and SQL/NoSQL databases. Experienced in **Agile/Scrum** delivery, **CI/CD pipelines (Jenkins, GitHub Actions)**, unit testing, and code reviews. Strong **object-oriented programming** foundation (C++, TypeScript) with rapid cross-language adaptability. Seeking to contribute to scalable, secure, enterprise-grade applications.

Technical Skills

Languages: JavaScript (ES6+), TypeScript, Python, C++, SQL, HTML5, CSS3
Backend: Node.js, Express.js, RESTful APIs, Microservices, Event-Driven Architecture, JWT Authentication
Frontend: React, Next.js, Tailwind CSS, Bootstrap, Responsive Design
Databases: PostgreSQL, Oracle SQL, MongoDB
DevOps & SDLC: Git, Jenkins, GitHub Actions, GitLab, Docker, Kubernetes (Minikube), CI/CD Pipelines, Linux, Agile/Scrum, Jira, Confluence, Postman, Unit Testing
AI/ML: LLM API Integration (Claude, Gemini, DeepSeek, Ollama), RAG, AI Agents, Prompt Engineering

Work Experience

Hallow Tech Pvt. Ltd.

Junior Software Developer

Kathmandu, Nepal

Sep 2021 – Oct 2022

- Contributed to full-stack development of web applications using **Node.js, MongoDB, and JavaScript**, supporting hundreds of active users in production.
- Designed and implemented **RESTful API** endpoints and frontend components in an **Agile/Scrum** environment, reducing bug reports and rework during QA cycles by approximately 20%.
- Authored technical **documentation** for API endpoints and onboarding guides, improving knowledge transfer across the development team.
- Collaborated with 5+ senior developers through Git-based workflows, **code reviews**, and sprint planning, improving deployment consistency and code quality.
- Debugged and resolved 10–15 issues per sprint, improving application stability and reducing user-facing errors.
- Queried, updated, and managed application data in **MongoDB**, ensuring data integrity and query performance.
- Participated in **unit testing** and QA processes, contributing to on-time delivery across multiple feature releases.

No Frills (Loblaw Companies)

Store Associate (Part-time)

Toronto, ON

Mar 2023 – Sep 2025

- Maintained a 98% stocking accuracy rate by implementing an effective organizational system in a leadership capacity, ensuring product availability and minimizing customer wait times.
- Resolved 30+ daily customer inquiries while maintaining a 95% customer satisfaction rating despite frequent schedule changes, demonstrating adaptability and communication skills.

Projects

AI-Native Organization OS | Python, Ollama, LLM APIs (DeepSeek, Gemini), RAG

- Architected an **event-driven multi-agent framework** integrating local Ollama deployments and cloud LLM APIs to run autonomous task-planning loops, real-time **RAG** diagnostics, and serialized queue orchestration.

Barahi Shop & Barahi Shop Manager | Node.js, Express.js, MongoDB, EJS, REST APIs

- Built a full-stack **e-commerce platform** with product browsing, cart, and checkout, maintaining 94% uptime; developed a companion **admin panel** for inventory and order management with role-based access.

Pomodoro Timer with AI Assistant | React, TypeScript, LLM API Integration

- Developed a productivity timer application featuring an integrated **AI chat assistant** for task guidance and focus coaching.

Task Planner | JavaScript, Node.js, PostgreSQL

- Created a task management app enabling users to create, categorize, and track tasks with **deadline reminders** and productivity analytics.

Multimedia Management System | C++17, STL, OOP

- Developed a C++17 application managing books, movies, and TV shows using **polymorphism, STL containers**, dynamic memory safety, and exception handling.

Education

Seneca Polytechnic

Computer Programming Diploma

Toronto, ON

Jan 2023 – Oct 2025

- Relevant Coursework:** Data Structures & Algorithms, Object-Oriented Programming (C++), Web Programming for Apps and Services, Software Testing, Software Analysis & Design (UML), UNIX/Linux
